

SAFE RAPID ACCESS

# Ladder Safety Accessories

- QUICK AND SIMPLE TO RETRO FIT TO ANY LADDER
- RUBBER COVERING PREVENTS DAMAGE TO FACE OF BUILDING
- HEAVY DUTY RUBBER FEET PROVIDE HIGH LEVELS OF GRIP
- EASILY TRANSPORTABLE

# Ladder Safety Accessories

Our ladder accessories ensure that your existing ladders are used in compliance with OSHA, ANSI and CSA standards.

The **Ladder-Spurs** are manufactured entirely from non-corrosive, Zinc-plated steel. They prevent outward slip by increasing the base of your ladder and significantly reducing the chance of a sideways slip at the top. Secured with heavy duty ratchet straps, the independent spurs simply wrap around the ladder side rails. They can be attached at any height position to allow for sloping ground, and eliminate the need for someone to stabilize the base. Finally, quick installation and release time ensures that you will save both time and effort.

The **Ladder Stand-Off** incorporates a large "V" which allows the ladder to span around down pipes or rest on the corners of buildings. Additionally, the "V" shape allows for increased stability. The top of the ladder is kept 1ft off the wall making it ideal when working under eaves.

Easy attachment of **Ladder-Spurs**

## Technical Specification

### LADDER-SPURS

Width at base	3in
Maximum stringer size	4.7in x 1.4in
Weight	11lbs
Reach	1.6ft
Material	Steel

**LADDER-SPURS**

### STAND-OFF

Width	3.25ft
Stand-Off distance	1ft
Maximum run diameter	1.6in
Weight	9lbs
Material	Aluminum

**STAND-OFF**
